

## Lost Melody

Dragonsfire

All shall unite, stand side by side  
'Cause together we belong  
We're here for you, playing our song  
So sing along with pride  
Raise your hands high and give us the sign  
Feel the music again  
All of you out there who live by the sound  
Cursed and blessed is our game

Sing along, the song of the damned  
Sing with me, the lost melody,

We play on, and live on, this is the song of the damned  
Let's sing on, on and on, the lost melody

All we've been is what we are  
All we need is here  
Song of the damned

The call has been heard, salvation is here  
We've got what we prayed for  
All gathered here, start singing along  
And let the music play on  
Once you are with us there's no turning back  
'Til the final curtain calls  
The song that is played will always be heard  
It lives on forever in you

Sing along, the song of the damned  
Sing with me, the lost melody

We play on, and live on; this is the song of the damned  
Let's sing on, on and on, the lost melody

All we've been is what we are  
All we need is here - song of the damned

We play on, and live on; this is the song of the damned  
Let's sing on, on and on, the lost melody

All we've been is what we are  
All we need is here - song of the damned
