

Emptiness

Dubioza Kolektiv

Emptiness I'm getting away
From, trying trying to forget the reason I'm dying for
There is no doubt it will happen
What is ment to be
There is nothing about you should worry
Just relax and don't hurry

Everything's destroyed
But the river still flow
Sand the wind still blows
Don't be..afraid of
What's happening,
What's happening? everything's destroyed

Ya man bring it up man
It's about dreamin' now we can know how
It's about the wicked and we can know the way
It's about the waste of all those days
It's about the digital, the digital is teller
It's about religion and reachin' of the other
It's about hope and The God and a wideas
I understand man God's my guide
It's about the Sun man but it's gettin' hot
What can a man learn from life
It's 'bout something that I kept on my mind
It's 'bout I sometimes get real' high
But He hold me in handcought and held..
Who's enemy that'll knock the door
I'm in a hip-hop coz' i wanna' stop the war and
I'm in control they wanna' give me the limit
I don't wanna fight coz' I'll make a damage
Close to the finish, Close to beginin'
Close to the end, Close to illin'
And the most don't mind they would close the door
But now i can't stop now I wanna run remote,
Mind dumb and I wind them up and upon them
Gettin' them a hope and I can't stop
Can I get them up can I get enough,
get enough can they kill the human faith,
It's about mind under pressure
Cought in a measure
Talk in the mic
And the war was attention
And I say "Is it right beleive?"
the rules, in me, over me, follow me...
