## It's All Over

U know whatcha want, never gonna get it They say they never heard, when U know that U said it Finding a fine time to fuck up with your mind They plant the seed to grow, then close the show Every day U wake up, U never know where ya heading U know U gotta survive, so somethin' needs selling U keep yelling, but no one ever hears ya U silence violence Now they fear ya

Bang! It's all over BANG! BANG! It's all over

There's people inside for things they never did They were never free on the streets Now they're doing a year bid And they call that justice Can this, must this Carry on? Before long There will be a revolution And I don't think that they want this

High, that's where some go to get away Some people go too far, fly away Disease killing with ease, like it's outta control Like a pest control on fleas Please! Stop defending the system is ending U got nowhere to go, played the final card It's hard but truth is like proof Can't be ignored When Michael and the angels come for war

Bang! It's all over BANG! BANG! It's all over

Oooww controlling the mind of man The beast designed the plan But can it last 4 so long so wrong? What is going on, gotta re-arrange it But if you don't change it There will be a revolution And I don't think that they want this etc. etc.
