

When You Come Back I Won't Be Here

Easyworld

Don't tell me love is worth the waiting
You kept me hanging all these years
But it's so good to feel this patience running out
When you come back I won't be here

So why are you holding onto misery?
Don't you see there's nothing left to fear
Cos if you're chewing something ugly, just spit it out
When you come back I won't be here

Dear leader I am but a nothingness
But you're good at looking all sincere
But you've been getting everything you want for long enough
When you come back I won't be here

There are no prizes here for tolerance
We cannot all be insignificant
And if they still don't understand I'll just spell it out
When you come back I won't be here

Dear leader I am but nothingness
Whatever group you felt through here
If you by any chance you hear me, well listen up
When you come back I won't be here, no
When you come back I won't be here, no
When you come back I won't be here
