

It's Alright

Embodiment

Push the child into the wheel
Make your memories long
Take the leap into the space
Don't look back in fear

Now here my voice
Baby, I made it and it's all right
And I don't want it to end
Chase your prize on through the grave

Live beyond your dreams
Seize the day and ride the wave
Claim your destiny
Now here my voice

Baby, I made it and it's all right
And I don't want it to end
I reached beyond tall fables
Vultures by my window

Camera flashes daily
Caught in the glare
Welcome home! welcome home!
Baby, I made it and it's all right

And I don't want it to end
