

One Way Mirror

Example

Take me to a better place
Take me to a better place
On the otherside
On the otherside of life

Take me to a better place
Take me to a better place
On the otherside
On the otherside of life

And I tried, tried, tried
To meet you perception
And though it sounds good on reflection
Didn't promise to embody perfection

And I tried, tried, tried
To meet you perception
And though it sounds good on reflection
Didn't promise to embody perfection

One way mirror
Three wishes I refuse to deliver
You see the things I promise to give you
Abusing my liver
Get closer
The closer you expect it gets clearer

I can see you but you don't see me
I really need you but you don't need me
You see though it all, you see through the one way mirror
You see the things I promise to give you

You see the things I promise to give you
Three wishes I refuse to deliver

Take me to a better place
Take me to a better place
On the otherside
On the otherside of life

And I tried, tried, tried
To be the addiction
But that's the only place I go catch from
You were frosted to me like I was vixen

One way mirror
Three wishes I refuse to deliver
You see the things I promise to give you
The muse and my liver
Get closer
The closer you expect it gets clearer

I can see you but you don't see me
I really need you but you don't need me
You see though it all, you see through the one way mirror
You see the things I promise to give you

You see the things I promise to give you
Three wishes I refuse to deliver
You see the things I promise to give you
Three wishes I refuse to deliver
