Corruption

The lowest form of life that's crawling in our streets From seedy dope pushers to the politicians we meet The sorry religious vomit that infests in our TVs The weapons that we sell to the trash in the middle east Murderous drug smugglers pay their way to pass They look the other way when they take the kickback We've got to put a stop to this senseless bullshit Take all these people and throw them in the pit

Let us know - where our tax dollars are spent Tell us how - how much it costs to repent Time has come - for us to take a stand Let us know - when you meet our demands

You can take this all to hell Shove it up your ass where the sun ain't shining We know now what it takes to defend If disaster strikes then they'll be hiding You can take this all to hell Shove it up your ass where the sun ain't shining We know now what it takes to defend If disaster strikes, then they'll be hiding Corruption

From laundering money to hookers on the make There's always a scandal, someone's on the take They payoff for secrets, sell plans to a spy They cover their asses and say it's a lie Society cries when the vermin go free When they're done, what's left for me? This social disorder that's causing us pain Indecent disease, it's they who are to blame

Exodus
