## **Undone**

**Failure** 

Someone said they'd like to set you up
They're gonna feed on you just sleep now
Should've know they'd try and make you cry
They're gonna have fun now don't fight it

Let me come undone in your house
I need to kill some time tonite
Let me come undone in your mouth
I need to know that your the same

Could've guessed you were the only one
They wanted to laugh at believe them
No surprise you let it get to you
It was always there can't hide it

Your face is easy to hate Looking helpless and sincere Curls up in self-sickness Lick your wounds and dream of home

let me come undone in your house
Let me come undone and kill some time
Let me come undone in your mouth
Let me come undone and feel the same
