

Replicate

Fanfarlo

Replicate
It's going to happen soon
We're going to let it pass right through us

There is a tunnel here
We're going to bring our science down there
Redesign our lives there

It's going to rain away
But still it sleeps inside us
Until someone unties us

Is it dead enough
Is it still enough
Will it replicate inside our bodies now

We're waiting underground
How can we extricate ourselves enough
Or fight something that's part of us

Is it dead enough
Is it still enough
Will it replicate inside our bodies now
