

In The Dark

Faydee

In the dark dark dark dark my heart beats fast
Turn me on on on on I'm gonna make it last

take it off off off off let it let it go
Give me more more more more I'm gonna make you fall

In the dark you can watch me come alive
Lift me up lift me higher than the sky

Turn me on switch off all the lights
In the dark In the dark In the dark

Light it up In the dark Light it up in the night
Light it up I take it off I come alive

Light it up In the dark Light it up in the night
Light it up I take it off I come alive

I love you love you love you when you love me in the dark
I love you love you love you when you love me in the dark

I love you love you love you when you love me in the dark
I love you love you love you when you love me in the dark

In the dark dark dark dark Let me feel your lips
On my heart heart heart heart I feel it in your kiss

Mi amor mor mor mor til the day I die
Give you all all all all Give you all I have inside

In the dark you can watch me come alive
Lift me up lift me higher than the sky

Turn me on switch off all the lights
In the dark In the dark In the dark

Light it up In the dark Light it up in the night
Light it up I take it off I come alive

Light it up In the dark Light it up in the night
Light it up I take it off I come alive

I love you love you love you when you love me in the dark
I love you love you love you when you love me in the dark

I love you love you love you when you love me in the dark
I love you love you love you when you love me in the dark

It feels so good and I don't want this feeling to end
I feel so free I keep falling and falling for you again

It feels so good and I don't want this feeling to end
I feel so free I keep falling and falling for you again
