I'm not asking for advice Don't tell me sacrifice It's not the way I want The choice, I haven't got It's a case of doing something I face the man and lose a lot... Nothing seems to change, every town I turn to Story is the same up and down the country So, don't tell me "sacrifice." I've got to move to work I know what love is like I've got to move to work Oh, and it puts such a strain on us On you and me my love I wish there was another way for us For you and me and my love If I miss this train, there won't be another If I get delayed, they'll say "don't you bother" Here I go back again You know I wanna stay, I know you've got to eat Farewell until the weekend love You've got lots of friends that we've haven't seen for weeks. All I wanna do, is stay with you I've got to move to work There's no money, in this town I've got to move to work Wait 'til I got everything I want Wait 'til I got everything I need If you keep faith in me darling It will make this, make this easier All I wanna do, is stay with you I've got to move to work.
