

What Is the Light?

Flaming Lips

What is the light
That you have
Shining all around you?
Is it chemically derived?

'Cause if it's natural
Something glowing from inside
Shining all around you
It's potential has arrived

Looking into space, it surrounds you
Love is the place that you're drawn to
Looking into space, it surrounds you
Love is the face that you're drawn to

Looking into space, it surrounds you
Love is the place that you're drawn to
Looking into space, it surrounds you
Love is the face that you're drawn to

What is the light
That you have
Shining all around you?
Is it chemically derived?
