What Is the Light?

Flaming Lips

What is the light
That you have
Shining all around you?
Is it chemically derived?

'Cause if it's natural Something glowing from inside Shining all around you It's potential has arrived

Looking into space, it surrounds you Love is the place that you're drawn to Looking into space, it surrounds you Love is the face that you're drawn to

Looking into space, it surrounds you Love is the place that you're drawn to Looking into space, it surrounds you Love is the face that you're drawn to

What is the light
That you have
Shining all around you?
Is it chemically derived?
