

They didn't warn me
When I was running wild
The dragons breathing fire
In the backyard at night

We live in circles
And it's so hard to breath

Maybe the same old fears what have we here
Don't bring me down with you

Now I'm just chasing time
With a thousand dreams I'm holding heavy
And as we cross the line these fading beats have all been severed
Don't tell me our youth is running out
It's only just begun

If I asked you for good news
Would you smile and turn away
It's like a bad dream that is too afraid to wake

There are many among us
And we're changing all the time
Maybe the same old fears what have we here
Don't bring me down with you

Now I'm just chasing time
With a thousand dreams I'm holding heavy
And as we cross the line these fading beats have all been severed
Don't tell me our youth is running out
It's only just begun (x2)
