

Medicinal Reality

From First to Last

This is your day with a whole world to face
What is your price to appease?
You can march to the beat that puts us to sleep
Medicinal reality

All my life
I've been searching for hope to find
Something more than just pawns in a chess game
And blood stained names
Just fall in line
Fall in line

Can you feel the weight of two decades to date
All crashing down on you now?
You can march to the beat that puts us to sleep
Medicinal reality

All my life
I've been searching for hope to find
Something more than just pawns in a chess game
And blood stained names
Just fall in line
Fall in line

Free from the womb with only a name
Make something of yourself
Before you're made a slave
'Cause life will not wait
Life will not wait
The sun's gonna rise either way

March to the beat that puts us to sleep
Medicinal reality

All my life
I've been searching for hope to find
Something more than just pawns in a chess game
And blood stained names
Just fall in line
Fall in line
(2x)
