Burning Road

Circle the world And fly by night I had a hunch Why did they try? 42 days long Turbines had fried Impossible Genius says alright!

Burning road Seen more than they know Burnin' road On and on they roll

Center space has gone Keepin' a straight line El camino soars Disappeared from sight Big block made news Try to analyze The pressure crew Genius says alright!

Waiting for Close at hand I think you're right Now what's your plan A few hours passed Now lost sight Ask me again Genius says alright! (sounds like gene dammit)

Fu Manchu
