

# Over The Edge

Fu Manchu

Keep it centered - keep it low  
Keep it runnin' - let's go  
Watch it climb - on its own  
The more we see - the more we know

We know  
Four wheels and a lift  
What we gave - we get  
The convoy was down

There was nothing left - no one around  
We strapped ourselves in tight  
We were the first - and we're alright  
It's movin' way too fast  
Now shut the doors - and hit the gas

So over the edge  
They said

I lift my head I soon realized  
I remembered - back in time  
What was rollin' along  
Movin' circle - on and on

An image so small  
We heard the word - we heard the call  
Let's keep our story straight  
It doesn't matter - it's way too late

The more we see We know the more we know
