

A Feelin' Like That

Gary Allan

I stepped out into the blue, felt the wind hit my face
Before my chute opened, I felt my heart race
I was fallin'
Nope, that's just fallin'
And off the coast of Australia I dove way down deep
For all that I saw of that Great Barrier Reef
It was nothin'; compared to you it was nothin'

I got lightning in my veins and thunder in my chest
All tangled up with you and tryin' to catch my breath
Been chasing that sensation halfway 'round the world
And lookin' back on what we had
Well, I've done it all, and I've seen it all
But I can't find a feelin' like that

Well, I've wound up in some town in Spain runnin' with the bulls
Tryin' to catch another thrill with a thousand other fools
We were runnin', aw, but that's just runnin'
When I started pushin' thirty, it started pushin' back
Well, how was I to know till now you'd be such a hard act to follow?
Nothin' seems to follow

I got lightning in my veins and thunder in my chest
All tangled up with you and tryin' to catch my breath
Been chasing that sensation halfway 'round the world
And lookin' back on what we had
Well, I've done it all, and I've seen it all
But I can't find a feelin' like that

It's like flyin' down some back road at midnight
With your eyes closed and the headlights off
Girl, I've been searchin' everywhere
Can't find that feelin' anywhere
You're all I want now, all I want

It's that lightning in my veins and thunder in my chest
All tangled up with you and tryin' to catch my breath
I been chasing that sensation halfway round the world
And lookin' back on what we had
Well, I've done it all and I've seen it all
But I can't find a feelin' like that

That's right, I've done it all, and I've seen it all
But I can't find a feelin' like that
