

Drop

Gary Allan

Drop, raindrop fallin' from the sky like magic
Can ya feel it in the air
Drop, you oughta drop on by 'cause it's warm inside
And there's a storm out there

I'll drop, another log under the fire
Get the flame a little higher
"Til it feels just right
And I'll drop, a blanket on the floor
There's some wine I'm gonna pour
And pull the shades down tight

Ain't nowhere you need to be
Then wrapped up here with me
I'll turn the lights down, way down low
You let that dress drop nice and slow
Girl, I know it's true
You know just what to do
To make me drop everything for you

Drop, your hair down your shoulders
Get a little closer 'cause it's that kinda day
I'll drop, drop the needle on the record
The one that makes ya wanna love the night away

Ain't nowhere you need to be
Then wrapped up here with me
I'll turn the lights down, way down low
You let that dress drop nice and slow
Girl, I know it's true
You know just what to do
To make me drop everything for you

Ain't nowhere you need to be
Then wrapped up here with me
I'll turn the lights down, way down low
You let that dress drop nice and slow
Girl, I know it's true
You know just what to do
To make me drop everything for you

Come on drop, drop everything for you
You make me wanna drop, drop, drop, drop, drop
Yeah, drop everything for you

Drop, drop, drop, drop, drop
Drop everything for you
