

We Touched the Sun

Gary Allan

We touched the sun
We held the stars
We fell in love with open hearts
We chased our dreams
That went beyond
We did it all
We thouched the sun

When I look back Im glad we found each other
With no regrets along the way
And what was like and endless summer
Its just yesterday

And even if its not forever
We were meant to be together
Even if its only for a while

We touched the sun
We held the stars
We fell in love with open hearts
We chased our dreams
That went beyond
We did it all
We thouched the sun

We chased our dreams
That went beyond
We did it all
We thouched the sun
