

Over Something Good

George Jones

Your eyes could light the world tonight that's just how much they glow

Your face could give your heart away, everyone would know
But you have fell in love with me, I never thought you would
But don't you let yourself feel bad over something good.

Let's be proud to show the world just what we've got into
Don't hang your head when you walk by, honey, let it show on you

So hold me close and don't let go, darling, even if you should
And don't you let yourself feel bad over something good.

Over something good I know you're feeling bad
But think about the lovely nights we've had
The things would be much better, darling, if you only could
Keep yourself from feeling bad over something good.

Oh, things would be much better, darling, if you only could
Keep yourself from feeling bad over something good...
