Angel Dream

Glen Campbell

I dreamed you I saw your face Caught my lifeline When drifting through space I saw an angel I saw my faith I can only thank God it was not too late Over mountains

I floated away 'Cross an ocean I dreamed her name I followed an angel Down through the gates I can only thank God it was not too late

Sing a little song Loneliness Sing one to make me smile Another round for everyone I'm here for a little while

Now I'm walking This street on my own But she's with me Everywhere I go Yeah, I found an angel I found my place I can only thank God it was not too late I can only thank God it was not too late I can only thank God it was not too late
