

# You Can't Walk Away From Love

Gloria Estefan

Here I am before you  
Naked in your eyes  
Hoping with each kiss  
You will never see through my disguise  
I have been made to believe  
That no one could love me for me  
The good and the bad  
First to the last  
No matter the cost  
No matter the past

Your eyes only see what they wanna see  
Your heart makes the truth what you want to believe  
Passion turns pain into ecstasy  
You can't walk away from love  
Loving you more than I do myself  
Revealing the things I would never tell  
Daring to risk even life itself  
You can't walk away from love

There will be no other  
Lips against my skin  
No need to regret  
How can pleasure ever be a sin  
I tried to make you believe  
You meant almost nothing to me  
Through all the lies  
Chasing a dream  
Finding at last  
The woman in me

Your eyes only see what they wanna see  
Your heart makes the truth what you want to believe  
Passion turns pain into ecstasy  
You can't walk away from love  
Loving you more than I do myself  
Revealing the things I would never tell  
Daring to risk even life itself  
You can't walk away from love
