Temptation

Godsmack

It craws down deep inside Without a pulse or a will to die Now I've known the simplifies And now it takes what it takes And let the feeling suffocates Its nothing new, it'll get its way Another thing that i'll see Is how it gets inside of me And tears away my life

It's time to love, its time to hate It's commin' face to face trying to desecrate No time at all to break away Temptation still got a hold on me

It's awake even when you sleep It breathes without a heartbeat Making me incomplete And now I know what I know Expect the demon down below to surface through my moral soul And now it looks to be smiling as it's killing me Day to day I lie

It's time to love, its time to hate It's commin' face to face trying to desecrate No time at all to break away Temptation still got a hold on me It's time to love, its time to hate It's commin' face to face trying to desecrate No time at all to break away Temptation still got a hold on me

It's time to love, its time to hate It's commin' face to face trying to desecrate No time at all to break away Temptation still got a hold on me It's time to love, its time to hate It's commin' face to face trying to desecrate No time at all to break away Temptation still got a hold on me
