

## Will And Mercy

Golden Earring

Will's a broken down lover  
Who's never been outside the city he lives in  
He's got memories of better days  
And he's floatin' in his dream  
But tonight's the night that's gonna change his life  
Gonna change the whole situation  
Mercy just got off the train  
Gets a cab at the station

Time and time ahead, coming in the clear  
Lonely hearts, disappear  
Cause Mercy's on her way and Will don't have to wait  
Time and time for the day, anymore

Mercy's got enough of the now and then  
Of her strait jacket existence  
So she packs her bags and cuts her hair  
And throws away the ribbons  
Cause tonight's the night that's gonna change her life  
Gonna change the whole situation  
Will just turned the free sign off  
Baby where can I take you

Time and time ahead, coming in the clear  
Lonely hearts, disappear  
Cause Mercy's on her way and Will don't have to wait  
Time and time for the day

Who, who will stop the rain again  
We will stop the rain and then....

Time and time ahead, coming in the clear  
Lonely hearts, disappear  
Cause Mercy's on her way and Will don't have to wait  
Time and time for the day, anymore
