

I Don't Want To Record Anymore

Grandaddy

One, Two, Three, Four
Tamn the tones
And test the tones
That pre-amp does
Impass the lomes
Continuing the input please
Dial in the gates release
Reverse phase and reverb plates
Will give the instrument some space
Earphone monitor fatigue
Green compression from Jonique
I sound as though I know my stuff
And sure I guess I know enough
But I'm just a dork
And can't really record
I'm sorry I won't say no more
Except for
I don't want to record anymore
