

# In The Dark With You

Greg Brown

People are in the dark, they don't know what to do  
Add a little lantern, oh but it got blown out, too  
I'm reaching out my hands  
I know you are, too  
'Cause I just want to be in the dark with you

Every day, every night, all over my whole life through  
Just let me be in the dark with you  
Every day, every night, all over my whole life through

Every year what you hear goes from worse to worse  
Some say the whole world suffers beneath a curse  
I know less all the time  
Kiss me 'fore I prove that's true  
Just let me be in the dark with you

Every day, every night, all over my whole life through  
I just want to be in the dark with you  
Every day, every night, all over my whole life through

Ah, the people are in the dark, they don't know what to do  
Add a little lantern, oh but it got blown out, too  
I'm reaching out my hands  
I know you are, too  
'Cause I just want to be in the dark with you

Every day, every night, all over my whole life through  
Just let me be in the dark with you  
Every day, every night, all over my whole life through  
Just let me be in the dark with you
