## **Boredom**

Grinspoon

What you say Will go away Nothing celebrated for the keep sake I'm inclined To ride away and then walk alone. Special day and i'm ok You have forgotten what i've told you If you find another way then let me know. Like boredom when you're down town Misfortune and then you Process bent and all inside Above the houses down beside You been licking all If you would ever fell apart As you relate A perfect place Cause he does not really remind you Of your fate That awful day, that valentine Like boredom when you're down town Misfortune and then.. ΗEΥ Can you live another love in your vein SPACE When the heart's ready to fly away WAIT Well can you give this mother fucker a break SPACE, WAIT Like boredom when you're down town Misfortune and then you I'm feeling close to clouds now It's like feeling close to you.
