

Where Was I?

Guttermouth

Well, country's in the red
Soon we'll be dead
No life, not even a flower
Cause atomic power
Scares the shit out of you
There's nothing you can do
Undecided men
Bout a war you can't win
Hey, who would want to win the damn thing anyway, right boys?!

Children turn green
The flowers die
All the people are gone except I
The atom bombs have exploded near
Where was I if I wasn't here?
Atomic was one way out
Nuclear was the final bout
Atomic war can destroy our race
Leave the earth in all but waste

But, where was I
When the trouble started?
Where was I when the two sides parted?
Where was I if I wasn't here?
Cause the atom bombs have exploded near
But nothing's happened to me so...
