Doesn't it look good for flying Can't wait for high noon to fall into night Put out my arms the air just takes me Rising moon calls me into the sky

Up, up I go
Searching on my radio

Pilot through time Spirit flying Move with mine Out of time

Pilot I fell through From the blue I just flew Into you

If the air is high and I hear the moon I'll find you alright
Wherever you're hiding in the night
I know it won't be long
Your signal's getting strong

Pilot through time Spirit flying Move with mine Out of time

Pilot I fell through From the blue I just flew Into you
