White Lightning & Wine

This night's gone, we're moving on Highway's calling out aloud I bring them in with eyes of sin It's a down drinkin' freaky crowd

I chew you up and I spit you out Never want to know your name Don't want to know you just I sure want to show you Never will forget I came

On the world's all mine White lightning and wine came on so fast When did I last feel this fine? Ooh yeah White lightning and wine, yeah

Sweet little one, let me love you some Take me or leave me alone The gooder they come, the harder they fall Turn around you are a nasty joke

Yeah, we all laugh oh, hah, what a gas Watching you chew on the bones In the morning light you didn't look so nice Guess you'd better hitch hike home

On the world's all mine White lightning and wine came on so fast When did I last feel this fine?

On the world's all mine White lightning and wine came on so fast When did I last feel this fine? Yeah yeah White lightning and wine

Alright Alright Alright Alright

Heart
