I Gotta Dream On

Herman's Hermits

Your pretty face came into view And then what could I do? My dream began again So here I go into a world where I can Dream on, just thinkin' of you I gotta dream on; that's all I can do

Now that you know how I feel for you It just goes to show I'll be true to you So here I go into a world where I can Dream on, just thinkin' of you I gotta dream on; that's all I can do

'Cause if you want me by your side You gotta hold your hands across the sky Tread the stairway through the stars Into your arms, into your arms

Your pretty face came into view...

'Cause if you want me by your side...

Your pretty face came into view...

I gotta dream on, just thinkin' of you I gotta dream on, that's all I can do
