

## Scars

Hocico

Show me your vices  
My vice is you  
And it's destroying me deep inside

Show me your sickness  
My cancer is you  
And it's eating my inner cells insane

Show me your wounds  
My wound is you  
And it will open forever more

Show me your addiction  
My addiction is you  
And that's exactly what I refuse

All I need is what I get  
You can have me is what you said  
I can tell you what I've got  
All is nightmares, all is false

It's eating me insane

My body is bruised,  
My body is scattered  
I wish you're dead,  
I guess you're dead

Recall my name when nothing else stays  
You'll never get the answers on old days  
Recall my scars when you take off your disguise  
While falling dreams are calling and taking your life
