

V1

I take you in for just a while  
Like how the coast line tends to smile  
On the days,  
With the waves, lemonade,  
Quiz my heart, I still say,  
A girl she came and caught my eye  
About the third week of July  
Turn around, and I found one more  
And said "how bout' we get away?"

V2:

Strange how we choose our company  
She runs her fingers down my cheek,  
She has a thing for mixed Cd's  
I think She's growing on me  
I spent my days just passing through  
Theses roads that lead from here to you  
You're gravity is what pulls me through  
I know she's growing on me

Chorus:

Trying to keep myself together now  
Trying to keep my head locked on it  
Trying to hold onto this love  
I said how bout' we get away?

V3:

She's like the girls I used to see  
In all those black and white movies  
She's my Georgia royalty  
And now she's growing on me  
This girls the music in my room  
Each day the reason why I move  
She's the song that gets me through  
Now she's growing on me  
Yeah

Chorus: (again)

Bridge:

Spent two weeks on fire  
Can my hopes get higher?  
We'll burn like the sunrise  
It's changing my life

Chorus (2x)
