

# Never There

Hoobastank

I'm filling up inside  
Like i need to open wide  
And pour my heart out to you  
But i'll just get denied  
And all i wanted was someone to hear what i'm going through

Everytime that i need you around  
You're never there (never there)  
You're never there (never there)  
Because in my life is where i need you now  
But you're never there (never there)  
You're never there (never there)

You were supposed to see  
All the signs i left to read in front of your face  
You were supposed to be  
The closest thing to being me  
But you're the furthest away  
That's because.....

Everytime that i need you around  
You're never there (never there)  
You're never there (never there)  
Because in my life is where i need you now  
But you're never there (never there)  
You're never there (never there)

You're never there

And i doubt  
That i will ever find out  
If there's a way to get out  
Of feeling all alone  
Cause latley  
I've been thinking  
Maybe  
That no one's going to save me  
I'll do it on my own.....

On my own

Everytime that i need you around  
You're never there (never there)  
You're never there (never there)  
Because in my life is where i need you now  
But you're never there (never there)  
You're never there (never there)
