

# What's Going On Here?

Hootie & The Blowfish

Do you see heaven  
Like I do  
Or is it just me  
Wanting you

Tonight I'm special  
Like no one else  
I hope you need me  
For yourself

Does it make you happy  
To be so free  
The times we shared  
You loving me

And as you leave  
And walk away  
Your eyes they tell me  
Someday you'll stay

What's going on here  
What must we fear  
To live in this fantasyland in your mind  
Who'll carry the load  
For dreams left untold  
Can you live in this world all mine

I would walk this journey  
To say goodbye  
To have you close would  
Make me high

All the good things  
That made you see  
It was the strong thing  
Being with me

What's going on here  
What must we fear  
To live in this fantasyland in your mind  
Who'll carry the load  
For dreams left untold  
Can you live in this world all mine

Just look high above  
And you'll see where we should be  
And if tomorrow makes  
If tomorrow breaks us

Then you stand still and I'll  
Show you me

Like you never knew  
Or is it just me  
Wanting you  
So as you leave  
And walk away

I knew you'd come back  
Now let's play

What's going on here  
What must we fear  
To live in this fantasyland in your mind  
Who'll carry the load  
For dreams left untold  
Can you live in this world all mine
