The Wolfpack

Hopes Die Last

You are full of shit!!!

Life is one
I'd rather die instead of wasting my time
Years pass by
And all we did is prepare to die
Here I stand
This time I came with the heart in my hand
In the end
I gave it all but I want it back

We are the ones that bring disaster
With hell above and heaven below
We are the ones who don't obey the master
The blood that flows will be never enough

I woke up
Everyday on the wrong side of the bed
All screwed up
I got my guns cause it's time to react
It will hurts so bad
Like a kick in the teeth
All I do is keep your neck on a leash
I wont cringe
Down on the floor like a whore at your feet

Fire motherfucker

All my bullets are my sons
I love 'em all and they will love me
I'll stay lazy on your throne
And I will love it and it will love me
They will love me

We are the ones that bring disaster
With hell above and heaven below
We are the ones who don't obey the master
The blood that flows will be never enough

Drive your nails
Dress your crown
Stop your bitchin'
I'll burn your cross and I'll be fine
