

So Incredible

Ilse DeLange

In the middle of the day
When the sun is aching
And I try to make my way
But the sidewalk's breaking
Watch me slip between the cracks
As I fall and fall and fall
And I wonder where I'll land
If I ever land at all

Oh, there's your hand

So incredible, the love we have
The things we hold, let's make them last
You pull me through
When I get stuck in other little distractions
So incredible
So incredible

In the middle of the night
When the stars all gather
They conspire with the sky
I'm sure it's me they're after
Try to steal away my dreams
Keep them for themselves
As I'm stirring in my sleep
Please just help me wake up

Oh, there's your hand

So incredible, the love we have
The things we hold, let's make them last
You pull me through
When I get stuck in other little distractions
Everything happens, I still know
So incredible

Everything that we know
Spinning out of control
You never let me go
Oh, oh, oh

So incredible, the love we have
The things we hold, let's make them last
You pull me through
When I get stuck in other little distractions
Everything happens, I still know
So incredible
So incredible

So incredible
