

Stay With Me

Ilse DeLange

Sometimes I wake to catch the sun
Watch it rise before it runs routines
I turn around you're lying there
Like a Polaroid, a flash of you and me

Love me, never let me go

Stay with me
For just another moment
'Till you fade from me again
You come and go just like the wind
Whispering, and I give in
So stay with me
Stay with me

Like the Summer days in hourglasses
Slowly bloomed then quickly passed away
The butterflies have long gone still
I saved them all and put them on display

Love me, never let me go

Stay with me
For just another moment
'Till you fade from me again
You come and go just like the wind
Whispering, and I give in
So stay with me
Stay with me

Let me get lost in
My only memory is you
I would give all I have
I'll hold my hand out
Hoping that you'll find
And if you do

On my way to catch a train
On an early morning, pouring rainy grey
I saw a man come round the bend
The way he stopped and turned his head to say, I heard him say

Stay with me
For just another moment
'Till you fade from me again
Stay with me
For just another moment
'Till you fade from me again
You come and go just like the wind
Whispering, and I give in
So stay with me
