

# Chip Off The Block

Ima Robot

I want a chip off the old block,  
I want a girl who I can talk to.  
Stumbling through your neighborhood...  
Defacing walls just like I should.

Ooh, I wanted to be you, dirty like the skies.  
You live in space, your life's a waste, like mine...  
So let's just stop, before we die.  
I know you don't care at all.  
Ooh, but what if right before the end, we quit...?  
Now why don't we just stop, before we die...?

We saw our names in the lights...  
Chasing dragons through Echo Park  
Raising hell on a quiet afternoon,  
Sandbox heroes, we lonely fools.

Ooh, I wanted to be you...  
Take that and put it on lips, like mine.  
'Cause here in space, we're wasting all our time...  
So let's just stop, before we die.  
I know you don't care at all.  
Ooh, but what if right before the end, we quit, now die...  
And tell the truth, and don't you lie...  
And tell the truth, before we die...!

I always needed love...  
(All I needed was love, was love...)  
And I always wanted you...!  
(All I wanted was you, was you...)

(It's you, it's you...)  
(It's you...)

Ooh, I wanted to be you, dirty like the skies.  
You live in space, your life's a waste, like mine...  
So let's just stop, before we die.  
I know you don't care at all.  
Ooh, but what if right before the end, we quit...?  
Let's try, and what if they're right...?  
And it's darkness before the light...?  
Come on tell me your truth, 'cause you see, I told you mine...  
Oh, lets just stop, before we die...

(Before we die...)  
(Before we die...)  
(Before we die...)  
(Before we die...)
