## You Know Where to Find Me

## **Imogen Heap**

You know where to find me When you're on your way up Or bustle and busy Enough is enough 'Cause life's sweet assemblages Are quick to driftwood away Be still with me

You know where to find me For no particular reason For stop traffic behavior Or to get something off your chest 'Cause we go a long way back Back to nothing at all Mmmmm Be still with me

Oh-oh-ohhhhhhh Won't you be-Be still with me

You know where to find me If you think it's all over I can sense it a mile off It's no friendly hello You could be screaming drunk Well I've got my bad days too I'm gonna be here for you Be still with me

In a public place, private thoughts
A reminder of a precious loss
(I can be a source of constant reassurance)
Let the breeze block sadness drop
Oh-oh-ohhhhhhhh
Won't you beBe still with me

Heart, lung, soul Arteries and all. A shoulder at the ready Vital organs on call. Heart, lung, soul Arteries and all. A shoulder at the ready

Don't mistake my charity For what it is A deep need to be needed necessary Don't mistake my open arms For what they are They can turn on you So show me the money. Show me the money.

Blue and green, Fresh eyes on me I'm young again All things to men with Bite-sized life boats I'll fix your smashed up head

```
Be still with me
If you want
To be alone
If you'd rather die
Then tell
You'll know where I'll be
Where to find me
For hard talk
To call it off or bring it on
A proposal
If you're broken,
I'll be here,
I'll be here
For your secrets
For a breather
There's nothing you can do
```
