Dying Star

In the back of the bus I caught you smiling at the rain Your breath steaming On the window You've never looked So completely sane

Now heaven knows where I am Heaven knows I did all I can Heaven knows you'll go far But heaven knows you're a dying star

In the back of the bus I caught you smiling at the rain I turned gliding to the pavement I've never seen you that way again

Now heaven knows where I am Heaven knows I did all I can Heaven knows you'll go far But heaven knows you're a dying star

I've seen the wave you ride on... I've seen the wave you ride on... I've seen the wave you'll die on

Now heaven knows where I am Heaven knows I did all I can Heaven knows you'll go far But heaven knows you're a dying star
