

Still In Love

Jason Chen

I feel the same way
That you did about me yesterday
Promised you'd never leave me alone
The castles that we made
Were swept by the tide and washed away
And now the sunsets have all gone

Now time is moving, faster than before
And now we cant even seem to find the shore

Cause baby I know that you still love me
And baby know that I love you too
So tell me why cant we make it better
Cause all that I know is found in you
I'm missing your love, your face,
All of our past, don't let it erase
I know that you still feel the way I do
Because I'm still in love with you

I wanted to move on
But unlike you, I'm not that strong
And now our day in the sun has set
We walked side by side
Leaving footprints in the sand
now only my footsteps remain
(When the tide rolls in)

If I had just one more life
If I had just one more day
You would be my whole world
Be the only one I adore and
The next time, I hold you close
I won't hesitate no more
Cause baby this time
We're gonna fly high
And I will never let you go

Cause baby I know that you still love me
And baby know that I love you too
So tell me why cant we make it better
Cause all that I know is found in you
I'm missing your love, your face,
All of our past, don't let it erase
I know that you still feel the way I do
Because I'm still in love with you
