

# The Last Time I Made Love

Jeffrey Osborne

The first time I made love  
It wasn't love at all  
Didn't know what to feel, it didn't seem real  
That's all I can recall

I thought that's all there was  
Now I know so much more  
Now I know I never really made love before  
I'll tell you when I knew  
The last time I made love, I made it with you

The first time we made love  
It was all that it could be  
Your soul in mine, suspended in time  
Blended perfectly

The magic that we made  
Is something that lives on  
Refusing to die, though I try to believe it's gone  
Once truth is always true  
The last time I made love, I made it with you

Now lovers come and go  
People give themselves too easily  
But through it all how sweet it is  
No matter what I do, when there's someone new  
That last time I made love  
I made it with you.
