Got It Good

If I had one wish
If I had one wish
It would be to be free of this fighting all around
'Cause it's so wrong
And it could be so right
In my heart I know we're here to grow, to love, to give, to learn, to live..
.
And I believe in miracles
Open up your eyes

Got a soul, got a mind Got a heart that beats in time You've got a smile, got a voice Got the gift of love You've got it good Don't forget how lucky you are Darling, darling, use it to connect with everyone

Don't you know we're golden Covered up with mud One day you'll see the truth that we all share the same blood Supposed to love thy neighbour Together we should stand Whatever colour, race or creed Come on and hold my hand 'Cause I don't differentiate We're all the same to me

Got a soul, got a mind Got a heart that beats in time You've got a smile, got a voice Got the gift of love You've got it good Don't forget how lucky you are Darling, darling, use it to connect with everyone

And it's getting so serious Crushed my heart in pieces But I know I'm not alone in wanting peace Not alone And if you feel what I feel Raise your hands with me

Got a soul, got a mind Got a heart that beats in time You've got a smile, got a voice Got the gift of love You've got it good Don't forget how lucky you are Darling, darling, use it to connect with everyone

Got a soul, got a mind Got a heart that beats in time You've got a smile, got a voice Got the gift of love You've got it good Don't forget how lucky you are
