## **Angel Eyes**

## **Jerry Cantrell**

Homely, thick in mind, never listen Worn, tired, siren drawn, tunnel vision Don't forget this chance only live once Sprung, hypnotized by light, had to get some

Get it all She said I forgive you Don't regret our time You've got to move on love

Angel eyes Four years and still I dream Agonize Such beauty not since seen

Bow down, piper leading, you were one Hungry, took the prize, then you got dumb Don't live out your life like a sad song Sprung, hypnotized by light, had to get some

Get it all She said I forgive you You must too or die You've got to let me go

Angel eyes Four years and still I dream Agonize Such beauty not since seen

Angel eyes Your face is all I see Agonize Forever haunting me
