So are we over now?

Do we just turn the page and let the story end?

Do we just walk away?

Just like we never meant

I know we said some things And now you want to leave But baby that's no reason To let a good love die

Why goodbye?
Why must it be this way?
So many words, so many other words
That we could say

Why goodbye After all this time? Can't we try? Why goodbye?

Why can't we work it out?
Why can't we talk it out a little more this time?
Search though the rain and find
A ray of hope still shines

We can't just close the door We're still worth fighting for We've come too far together To leave it all behind

Why goodbye?
Why must it be this way?
So many words, so many other words
That we could say

Why goodbye After all this time? Can't we try? Why goodbye?

The road of love is never easy
You'll get lost along the way
But in time you can find your way through

We can make it through the bad times
We can make it to the good times
Through the stormy weather 'cos we belong together

Why goodbye?
Why must it be this way?
So many words, so many other words
That we could say

Why goodbye After all this time? Can't we try? We're still worth fighting for We've come too far together To leave it all behind Why goodbye? Why goodbye?
