

# Evil on My Mind

Johnny Winter

When I think about my baby  
I got evil on my mind  
When I think about that woman  
I got evil on my mind  
It brings teardrops to my eyes  
And sends chills all down my spine

It sends chills all down my spine  
When I watch that woman walk  
Sends chills all down my spine  
When I watch that woman walk  
But she smiles right in your face  
And lie every times she talk

Don't believe that woman

Look out

They say your enemies can't hurt you  
If you keep track of your friends  
They say your enemies can't hurt you  
If you keep track of your friends  
I say you better watch your woman  
That's the one who threw you in

That's extremely true
