All They Ever Wanted

Johnossi

Rotten trees outside the city They've been there for years And that's all they ever wanted

Shallow figures within the city They've been there forever and ever And that's all they ever wanted

Don't follow me into the city I won't show you a good time I won't take you out dancing

Wouldn't it be nice to be stuck in the forest Like an old rotten tree with no need or wanting

Guns were made for disturbing the peace People in the city will never all agree On what they ever wanted

Some people think we all should have just one task And some people don't think before they ask Or everything they ever wanted

People in the city will never all agree On what they ever wanted
