

# Falling

Jon McLaughlin

Hey boys, you better hold real still and don't make a noise  
What she hears she kills  
Those little glances, she gives them out all day  
So don't waste your chances and just let her walk  
The way she's gonna walk all over you  
Your jaw is just gonna drop like the others do

Falling in love so fast,  
It hurts when I think back  
To the first time I saw her eyes  
The memory used to be a friend of mine  
But now she's in another town, probably  
Got the other boys running around  
And she'll bless them with the same curse  
Falling in love so fast it hurts  
Falling in love so fast it hurts

Hey girls, you better hide your men  
It's not just her looks and her curls  
It's what she does with them  
Don't look now but here she comes  
Rolling your name right off her tongue  
She stares at you as she talks  
You try to listen but you really just watch  
The way she's gonna walk all over you  
Your jaw's just gonna drop like the others, the others do

And you're falling in love so fast,  
It hurts when I think back  
To the first time I saw her eyes  
The memory used to be a friend of mine  
But now she's in another town, probably  
Got the other boys running around  
And she'll bless them with the same curse  
Falling in love so fast it hurts  
Falling in love so fast

Oh, there's nothing you can do  
She'll take your dreams and your nightmares  
And they'll both come true  
You're on a long, long list of fools  
In the end, when she's got your heart again  
You won't even know how she does it  
All you know is you freaking love it

Falling in love so fast,  
It hurts when I think back  
To the first time I saw her eyes  
The memory used to be a friend of mine  
But now she's in another town, probably  
Got the other boys running around  
And she'll bless them with the same curse  
Falling in love so fast it hurts  
Falling in love so fast it hurts  
Falling in love so fast... it hurts
